WARNING

- Due to reduced ground clearance remove plow Mount Brackets before trail riding.
- Do not exceed 5 MPH with the blade or its brackets installed

Periodically check for wear and tightness of all bolts, nuts and fasteners. Replace or tighten as necessary

All directions referring to the right and the left are when the operator is sitting on the ATV.

Model Number 15-3570 Attaching Bracket Installation Instructions

1. Fasten the left attaching bracket (Item 1), right attaching bracket (Item 2) and cross brace (Item 3) together using the four 5/16" x 3/4" carriage bolts (Item 6). Leave these four carriage bolts finger tight for now.
2. Position the assembly under the ATV. Make sure the tabs on the attaching brackets are towards the front of the ATV. Loosely secure the assembly to the ATV using the two 5/16" square U-bolts and locknuts. Slide the attaching bracket strap (Item 4) on top of the **Left** side footrest support tubes. Be sure the side with the two holes is toward the rear of the ATV. Using the three 5/16" x 2-1/2" bolts and locknuts, secure the attaching bracket in place, sandwiching the footrest support tubes between the left attaching bracket and the attaching bracket strap. Leave all the bolts and locknuts loose until you get the push tube centered. **ONCE THE PUSH TUBE IS CENTERED, TIGHTEN ALL BOLTS AND LOCKNUTS.**
