1. Remove the four U-bolts from the push tube attaching bracket. Place two of the U-bolts over the mainframe tubes on each side of the ATV, just ahead of the footpegs. See picture below.
2. Place the push tube attaching bracket under the ATV with the notch to the rear. Attach the push tube attaching bracket to the ATV using the four U-bolts. Tighten just until the attaching bracket comes in contact with the bottom of the frame tubes. Slide the push tube attaching bracket back until it contacts the footpeg plate that is wrapped around the mainframe tube. Tighten the four U-bolts completely.
