Model Number 15-3660 Blade Mount and Back Plate Attaching Instructions

1. Place back plate (Item 2) into the indented area shown in picture and insert two $3/8''$ x 1'' bolts from the top down into the two available holes in the cross member (*See picture below*). Align the blade mount weldment (Item 1) into position and insert three $3/8''$ x 1'' bolts from the bottom up in the three forward holes of the mount plate. Start all nuts but do not tighten at this time.

2. Due to limited room to get tools into the cross member in the rear, it is recommended to use a thinned walled $9/16''$ socket and ratchet to tighten these two $3/8''$ bolts. (Most $1/4''$ drive, $9/16''$ sockets should work). Tighten all remaining bolts.

If Manual Lift Kit # 15-0015 is used, follow the instructions below.

1. Unplug connecting wires for both headlights.
2. Remove the front grill by removing the four bolts.
3. Route the lift strap through the grill support frame as shown in picture below.

4. Reinstall the front grill with the four bolts and reconnect the two headlights.
